

SMA Service – Maintenance For Optimum Plant Performance

More power, more efficiency, more profitability: Regular maintenance improves the performance of your PV plant and at the same time minimizes the risk of a potential plant shutdown. SMA takes care of the entire maintenance process of the inverters and medium-voltage components. Our SMA service technicians are experts in all SMA products in your plant and can also install the latest firmware updates if required. Take advantage of the manufacturer's expertise. For enhanced safety. For greater success.

SMA offers maintenance services for Sunny Central inverters and medium-voltage components (station building, transformer, switchgear, low-voltage distribution system). Upon request, we can also carry out maintenance for Sunny String monitors and SMA communication products.

Your advantages

- Service from a single source: maintenance of the inverters and medium-voltage components
- Reliable operation of your plant through adherence to maintenance intervals and installation of firmware updates
- Avoidance of potential downtime and yield loss
- The SMA factory warranty remains valid, and the contractual conditions are fulfilled
- You can rely on the experts to take care of all the SMA products in your PV plant

Our services at a glance

Inspection

- Cable connections
- Fuse, grounding and fault indicators
- Entire station building
- Switching equipment
- Transformers

Measurement

- Surge arresters for the Sunny String monitors

Data acquisition

- Plant data for the inverter and medium-voltage component
- Key function values

Setting

- Required plant-specific and individual parameters
- If required, installation of the latest firmware updates

Cleaning

- Interior
- Filters and fans

Documentation

- Full documentation in the maintenance report

Important information: For the SMA factory warranty to remain valid, our customers must ensure that they have maintenance performed on the inverter at regular intervals and documented. Only in this way can we provide the best possible support free of charge during servicing. The same applies to other SMA service contracts, where regular maintenance is again a prerequisite for compliance with the contractual obligations. Our services are available only for components supplied by SMA.
